DAVID R. COX PRIZE  
FOR RARE COMPASSION

ESSAY CONTEST FOR MEDICAL STUDENTS

Global Genes™ is proud to partner with Student Advocates for Neglected Diseases (STAND) to present the third [David R. Cox Prize for Rare Compassion](#), an essay contest that connects medical students with the rare disease community with the goal of developing understanding and compassion for challenges and lifestyles that patients diagnosed with a rare disorder are faced with.

Medical professionals often do not encounter or recognize a patient with one of the nearly **7,000 identified rare diseases**; although, it is estimated that 35 million people in U.S., or 1 in 10, are living with a rare condition. According to the National Institutes of Health, a rare disease is defined as a disease that affects less than 200,000 people in the United States.

## Contest Summary

This essay contest helps facilitate the connection between medical students and those living with a rare disease. Interested medical students are matched with either a patient or family affected by a rare disease.

## Prize Amounts

First Place	\$1,500
Second Place	\$1,000
Third Place	\$500

## Eligibility

1. Medical students in their 1<sup>st</sup> and 2<sup>nd</sup> year of study.
2. Attending medical school in the United States, Canada or the United Kingdom.

A banner for the 2016 David R. Cox Prize for Rare Compassion. The top half has a dark teal background with the year '2016' in large white outline font, followed by 'DAVID R. COX PRIZE FOR RARE COMPASSION' in smaller white sans-serif font. The bottom half is a solid green bar with the text 'ESSAY CONTEST FOR MEDICAL STUDENTS' in white sans-serif font. The background of the banner shows a blurred image of medical students in white coats and scrubs.

DAVID R. COX PRIZE  
FOR RARE COMPASSION

ESSAY CONTEST FOR MEDICAL STUDENTS

## Key Dates

Tuesday, February 22, 2016	Matching Opens <i>Medical Students can request to be matched with a rare disease family.</i>
Wednesday, June 1, 2016	Essay Submission Opens
Monday, August 1, 2016	Essay Submission Deadline
Friday, September 9, 2016	Winners Notified
Friday, September 23, 2016	Winners Publicly Announced <i>Participants are welcome to attend the RARE Patient Advocacy Summit where the announcement will be made (Huntington Beach, CA).</i>

## Matching Process

Global Genes™ offers to match medical students with patients based on geographic distance (in most cases within 40 miles from the medical student). The medical student will build a relationship with the patient/family to better understand the challenges and day-to-day experiences that these individuals have.

If a medical student wishes to be matched with a rare patient, medical students can request a match at [https://globalgenes.org/coxprize\\_medstudentrequest](https://globalgenes.org/coxprize_medstudentrequest). Medical students may also utilize local resources through their medical schools to find rare families. Patient/Student relationship must have begun no earlier than June 1, 2015 (12 months from opening of submission period).

## Essay Guidelines

- Patient relationship must have been begun within the past 12 months (from date of essay entry)
- 2,500 word max
- English-language submissions only
- Must follow HIPAA requirements

## DAVID R. COX PRIZE FOR RARE COMPASSION

### ESSAY CONTEST FOR MEDICAL STUDENTS

#### Submission Guidelines

- Submitted essay must include no identifying information on author
- Submit in PDF format with the following filename:  
*AuthorFirstName\_ LastName\_CoxPrize\_2016*
- Must be submitted by August 1, 2016 at 11:59 pm PST at <https://globalgenes.org/cox-prize-submission-form/>  
*To view last year's winning essays, please [click here](#).*

Essay content should include one or more of the following:

1. Share reflections on the experience
2. Convey the scope and significance of the disease's effect on the patient, student, or society
3. Share examples of personal or professional growth, as well as potential solutions that, for example:
  - Enhance awareness among physicians for rare diseases in general
  - Strengthen interest among medical students and the medical community for addressing rare and neglected disease research and development
  - Pose strategies for improving the patient-physician relationship pertaining to rare disease management
  - Help patients and families cope with all aspects of living with a rare condition

#### Essay Evaluation Process

Submissions will be evaluated by a panel of professionals that comprise the Global Genes' Medical and Scientific Advisory Board and patient advocate leaders based on the following criteria (not limited to these):

- Extent of contact
- Compassion
- Novelty
- Overall gained insight

Top scoring essays will be notified by email on September 9<sup>th</sup>.

### **About STAND**

Student Advocates for Neglected Diseases (STAND) is a student organization inspiring future clinicians to care about disease communities often neglected by the healthcare system. Engaging medical schools across the country, STAND connects students with neglected patient groups. STAND was started by Colton Margus, a medical student whose two brothers have a rare neurodegenerative disease. For more information on STAND or to get involved, please visit [studentadvocates.org](http://studentadvocates.org) or email [info@studentadvocates.org](mailto:info@studentadvocates.org).

### **About David R. Cox**

David R. Cox, MD, PhD was an extraordinary physician scientist, becoming Professor of Genetics and Pediatrics at UCSF and later Stanford, as well as shepherding development of genomic medicine at Pfizer. In addition to his participation in the Human Genome Project and service on numerous national advisory boards, Dr. Cox showed uncommon compassion in his involvement with advocates for rare diseases. He was especially helpful to the A-T Children's Project, an organization aiming to cure a rare and debilitating genetic disorder, ataxia telangiectasia (A-T).

Despite no personal ties to the A-T family community, over the course of 20 years, Dr. Cox gave generously of his time and expertise, leading an advisory board and orchestrating focused, innovative research that accelerated the search for finding life-improving therapies for A-T children. Even after his passing in 2013, Dr. Cox continues to inspire future clinicians to engage the patient communities most in need.
